RegTech
365

TRANSFORMING COMPLIANCE, FRAUD & AML OPERATIONS

The Product

RegGuard

Advanced fraud monitoring and management systems for real-time threat detection and mitigation.

RegLearn

A dedicated compliance training academy offering continuous education and professional development.

RegPort

Automated AML/CFT reporting alongside robust KYC/KYB processes for enhanced due diligence.

RegComply

Comprehensive audit, risk and task management capabilities to ensure adherence to regulatory frameworks.

RegWatch

Free regulatory intelligence and alert services, keeping you informed of critical policy changes.

Key Operational Challenges

No Real-Time Fraud Prevention

Transactions are not actively blocked in real time.

Weak Suspicious Activity Detection

Limited ability to identify STR triggers (spikes, structuring, dormant accounts)

Manual Investigation Process

No structured workflow for reviewing flagged transactions

Fragmented Historical Data

No consolidated view of past suspicious activities

Limited Visibility

No real-time view of compliance posture

RegTech365 Solution

● RegGuard – Fraud Detection & Prevention

- Real-time transaction scoring (Allow / Flag / Block)
- Rule-based + AI hybrid detection engine
- Fraud typologies aligned with CBN requirements.

● RegPort – AML & Transaction Monitoring

- Real-time monitoring with STR/CTR flagging
- Sanctions screening, PEP checks, risk profiling
- Automated regulator-ready XML reporting

● Case Management

- Case creation, assignment, and tracking
- Historical transaction aggregation (case files)
- End-to-end investigation workflow
- Continuous feedback-based learning

Note:

- **KYC/KYB services operate on a credit-based system.** Credits are automatically funded by allocating 10% of RegPort fees. Once the allocated credits are exhausted, the user will be required to manually top up their wallet to continue using the service.
- **RegPort transaction monitoring is credit-based,** whereby users will be billed per transaction and invoiced monthly. They will be charged an agreed amount per transaction.
- **RegGuard transaction monitoring is credit-based,** whereby users will be billed per transaction and invoiced monthly. They will be charged an agreed amount per transaction.
- **Awareness training is available to all staff on RegLearn** at no additional cost; however, certified courses, virtual sessions, and physical training are priced separately based on the course and delivery method.
